

Security ~~Alert~~ Environment and Data protection

6th November
2025

Usage of the client and Relanto Hardware

Accessing Relanto Systems via **client** Devices or Networks

- Using client-provided laptops or client networks to log into Relanto platforms (Outlook, Teams, SharePoint, OneDrive) poses serious security and compliance risks

Transferring client Data from Relanto System

- Uploading client data to personal drives or accounts (e.g., Gmail, Google Drive, Dropbox)
- Sharing client information via internal Relanto emails or Teams chats
- Locally storing client files on Relanto-issued devices

Consequences of Non-Compliance

- Immediate removal from ongoing projects
- Project termination by the client due to policy breach
- Potential legal action or contractual penalties for both the employee and the organization

A large, dark blue arrow pointing to the right, with a white outline, is positioned on the left side of the slide. It is set against a background of a light blue sky and a grey, stylized cityscape with skyscrapers.

Data Protection Mandates and Zero-tolerance security rules

Do not upload, store or transfer source codes or proprietary information/ client data on personal devices, personal cloud accounts (e.g. Google Drive, Dropbox, iCloud), or any unauthorized platforms.

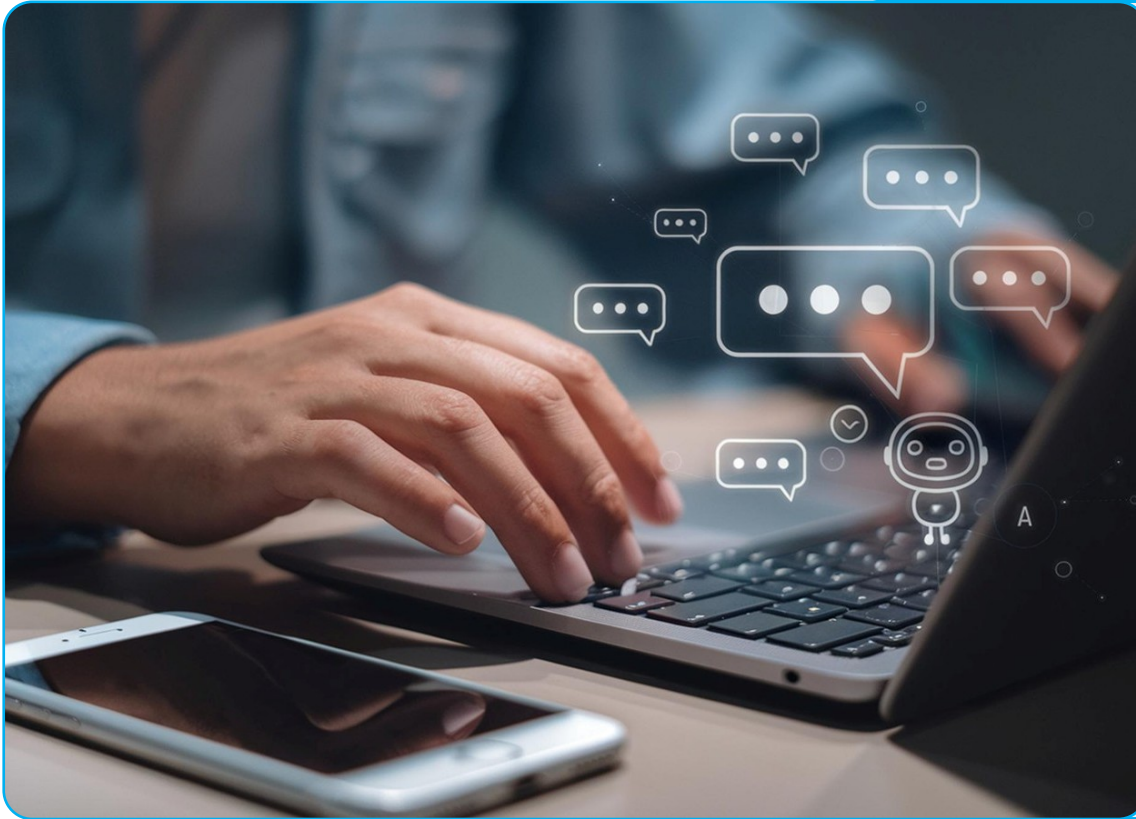

Security First

Do not use Relanto laptops to access, store, or share client data. Additionally, use of client data for internal POC's is prohibited. (e.g., personal email, online shopping, gaming)

Do not upload any files or screenshots from client laptops into Relanto Cloud (e.g. SharePoint, OneDrive), Relanto Microsoft Teams or any other Relanto-managed collaboration tools.

Do not send client data from client laptops using Relanto email IDs, Personal email accounts (e.g. Gmail, Yahoo), Messaging apps (e.g., WhatsApp, Slack, Signal)

Do not configure Microsoft Teams or other Relanto apps on client laptops using Relanto credentials or use a non-client network for sensitive work. (e.g., public Wi-Fi without approved VPN)

Security First

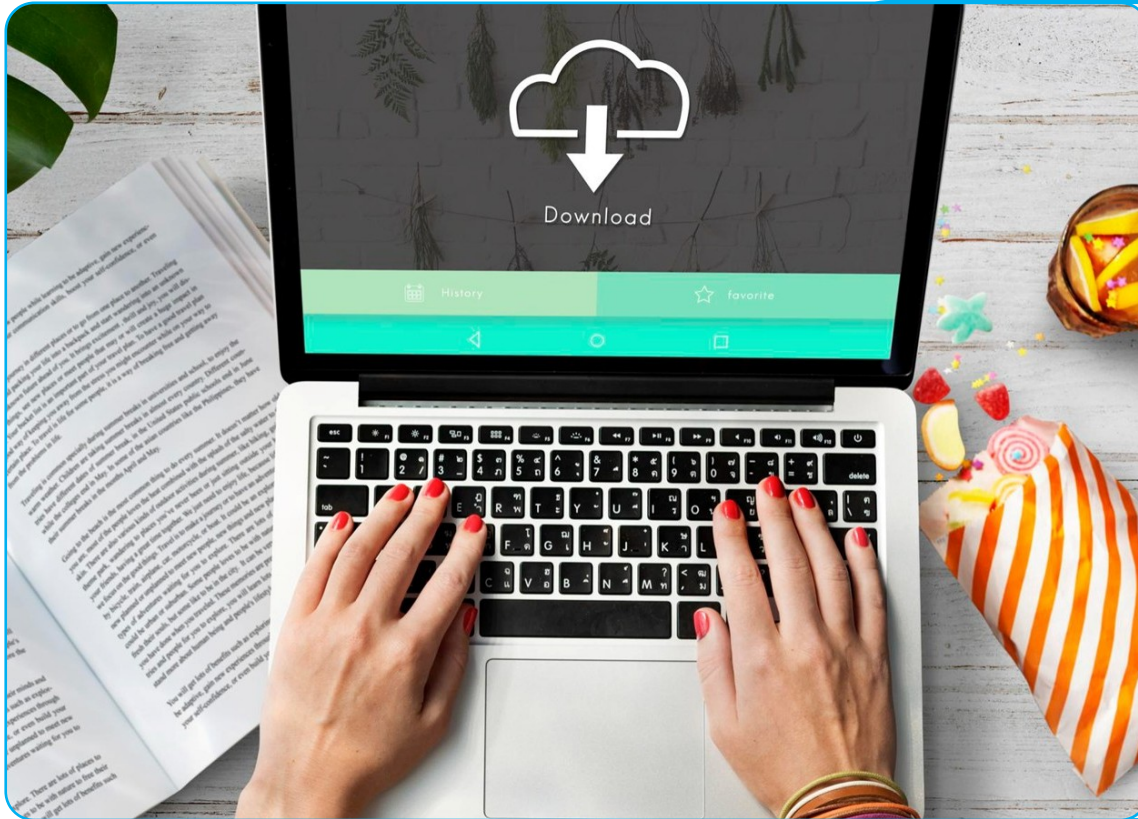

Do not install unauthorized third-party software on client laptops. (e.g., personal tools, non-approved utilities)

Security First

Do not connect unauthorized external hardware for file transfers (eg, USB drives, personal phones, non-approved peripherals) to client laptops without procuring client authorization in writing.

Security First

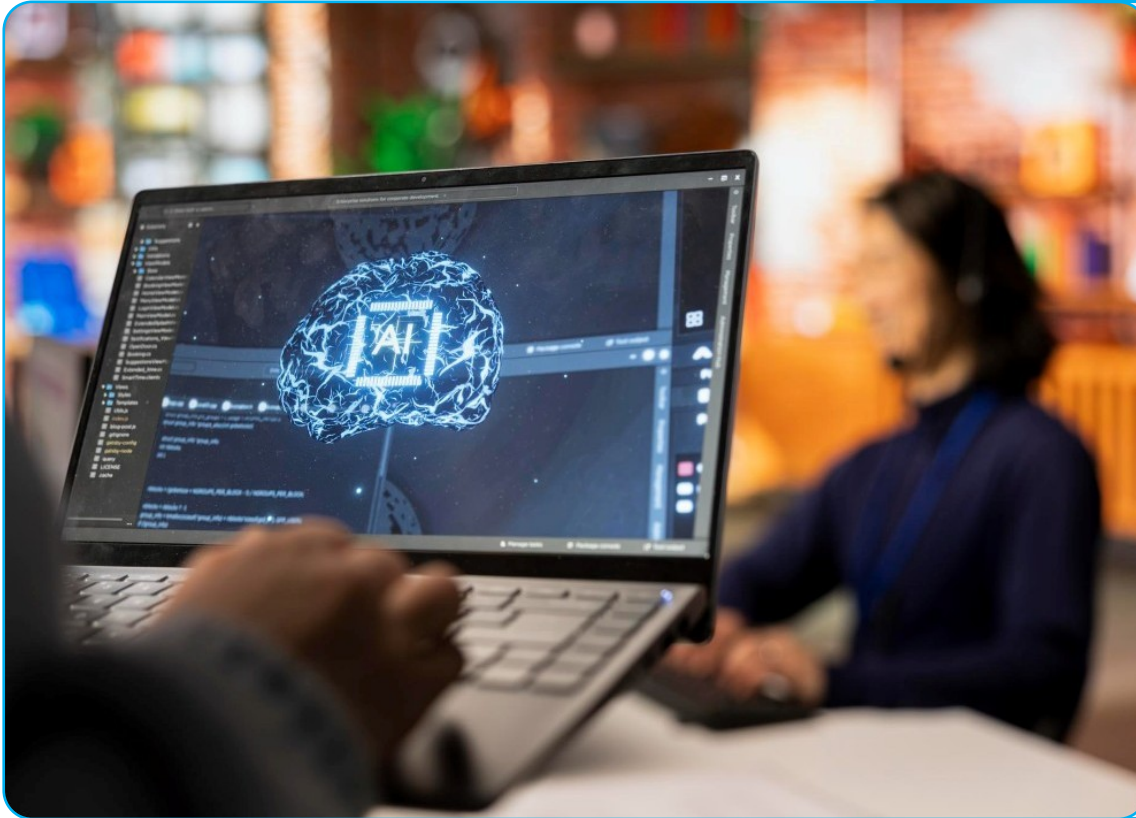

Do not download WhatsApp or similar messaging apps on client laptops nor use the client laptops for personal use (e.g., personal email, online shopping, gaming)

Do not use unauthorized AI tools (eg, ChatGPT, Copilot, Bard, or browser extensions) on client laptops unless explicitly approved by the client.

Employees are strictly prohibited from uploading, transmitting, or exposing client-owned code or proprietary data to any external Large Language Model (LLM) platforms—including but not limited to ChatGPT, Gemini, Sonet, and LLaMA- without prior WRITTEN authorization from the client.

Do not directly incorporate code generated by AI tools (including but not limited to ChatGPT, Gemini, Sonet, LLaMA, or similar platforms) into any customer application or code repository without thorough validation and explicit **WRITTEN approval from the client.**

Security First

Do not connect AI tools, either directly or via plugins, APIs, or integrations, to customer code repositories, GitHub, or environments under any circumstances unless expressly authorized in writing by the client and approved by internal compliance.

Examples of Unauthorized Platforms:

The following platforms are considered unauthorized unless explicitly approved by the client:

Cloud storage:

Google Drive, Dropbox, Box, iCloud Messaging apps: WhatsApp, Telegram, Signal, Slack (non-client instances)

Email services:

Gmail Yahoo Mail, Outlook.com

File-sharing

tools: WeTransfer, Mega, AirDrop

Social media:

Facebook, Instagram, LinkedIn, Twitter

AI tools:

ChatGPT, Copilot, Bard, Claude, browser-based AI extensions

Examples of Non-Approved Utilities:

System & Maintenance Tools -CCleaner, Driver Booster

Examples of 3rd Party software: Slack, Google meet, Zoom,

**Thank
You!**
